

Wellness Corporate Solutions

What Screenings are Right for You?

With Wellness Corporate Solutions (WCS), you get the dual benefit of our experienced team designing your wellness program, and qualified medical professionals delivering it.

When choosing from our comprehensive list of screening services, it is important to understand all of the options available, and choose the ones that best fit your Wellness Objectives. We offer a wide variety of screening and vaccinations, and our team of trained health consultants can work with you to determine the optimal choice.

Fingerstick vs. Venipuncture

In regards to blood screenings (cholesterol, glucose, PSA, A1C, etc.), you can choose between blood specimen collection methods: peripheral vein puncture (venipuncture) or fingerstick. Each has its advantages, and which one you choose should be based on your objectives.

Fingerstick blood tests are conducted with a single lancet stick and a few drops of blood from the participants finger. It is not as intrusive and yields results in less than 10 minutes. While not as accurate as venipuncture, it requires less setup and breakdown time and the equipment is much simpler to operate. The instruments we use to perform the blood tests are FDA cleared and lab accurate, and meet the gold standard for accuracy set by the Centers for Disease Control and Prevention. The same instruments are used throughout the country by physician offices and hospitals.

Venipuncture, on the other hand, is the most accurate form of blood testing and allows for a wider set of screens to be run on a given blood sample. For example, PSA, Thyroid, Liver and Kidney, and Blood Count are not available via fingerstick. In this method, each sample collected on-site and shipped to a laboratory for analysis, with the results being mailed/emailed to the participant in 2 to 3 weeks. Our phlebotomists use the follow universal precautions as set forth by the CDC.

How to Order a Screening & Wellness Program

WCS offers a wide variety of health services including screenings for Cardiac Diseases, Diabetes, General Health, Weight Management, Nutrition, and Vaccinations. The screens, panels and immunizations shown in your Pricing Sheet can be offered at an event in part or in combination. Regardless of what services you choose, all WCS health screening Programs are delivered via our proprietary methodology, the **Well Employee Delivery Model**, designed to implement health screening and vaccination programs with actionable results.

Step 1 - Login to WCS Partner Portal

The WCS Partner Portal is our partner access point on the web. On the site, our partners are able to download marketing materials, request a screening and wellness program, and contact our health consultants.

Step 2 - Select Your Screening Services.

- Cholesterol & Blood Glucose Screening
- Blood Pressure & Body Composition Analysis
- Vision Screening
- Bone Density screenings

Step 3 - Add Your Vaccination Services.

- Flu Shots
- Pneumonia Shots

Step 4 - Add Any Additional Services.

- Health Risk Assessments
- Employee Health Challenge
- Health Education & Coaching
- Chair-Massage
- Nutrition Seminar
- Healthy Cooking Demonstrations
- Healthy Back Exercises
- CPR Seminar
- Ergonomics Seminar
- Other Customer Education or Seminars

Step 5 - Submit Your Request.

One of our health consultants will contact you regarding your services request within 3 working days.
