Nationwide Biometric Screening Services

The WCS Difference

Superior Participant Experience

High Quality Staff

Our screening staff are W-2 employees, not contractors. They are carefully vetted by our Talent Acquisition team and receive extensive training. Staff are continually monitored: on-site supervisors provide constant feedback, and we rate each individual's screening accuracy and efficiency. Our standards are rigorous.

Simple Appointment Scheduling

Every single client receives a branded, customizable online appointment scheduler. Calendar syncing and text message reminders are standard, and a single sign-on option makes the participant experience seamless. Telephonic scheduling is also available through our in-house Customer Care Team at no additional cost.

Expert Health Education

Every screening includes a brief results review, with in-depth health education available as an optional service. WCS health educators are almost exclusively registered dietitians, offering expert clinical knowledge and extensive personal coaching experience.

Extensive and Convenient Off-Site Options

Our partnerships with multiple labs nationwide allow us to offer 5,000 off-site collection sites for spouses, remote employees, and employees unable to attend on-site screenings.

It's easy for participants to take advantage of off-site options: We provide physician forms and vouchers they can easily download, pre-populated with the participant's information for maximum convenience.

Stress-Free Implementation

Dedicated Program Management

Our dedicated Program Managers takes care of every detail, managing the implementation process from start to finish. We look for ways to tailor each event to the needs of your population. When you need assistance, your Program Manager is a single point of contact—always easy to access and ready happy to help.

Wellness Implementation Navigator (WIN)

The WIN is what helps us deliver consistent and successful screening campaigns every single day, nationwide. Because all Program Managers follows the same implementation process, you can rest assured that each of your employees will enjoy a superior screening experience.

Advanced Data and Reporting

WELLConnect: Advanced Data Integration

No more waiting for files: download screening data in real time, as often as needed. Connect to our API and send data directly to your platform, driving even higher engagement and participant satisfaction.

ScreenSMART: High Tech Data Collection and Powerful Event Mana

Our popular tablet data collection application is more powerful than ever. Real-time data transmission, always encrypted and secure. A health educator module with current and historical data. On-site satisfaction surveys with instant results. ScreenSMART also features a powerful Peer to Peer staff rating system that supports the highest-quality screening staff in the country.

ScreenSMART Live enables Program Managers to monitor key event statistics in real-time, including participant wait times and staff ratings. Program Managers use this data to guarantee events stay on track.

Client Dashboard

Up-to-the-minute statistics on participation, engagement, and population risk—at your fingertips, whenever you need them. Explore year-over-year metrics. Drill down results by population segment or worksite location. Benchmark your company's data against other organizations similar in size and industry type.
