

Biometric Screenings

Comprehensive Off-Site Options

Flexible Options to Support All Employees

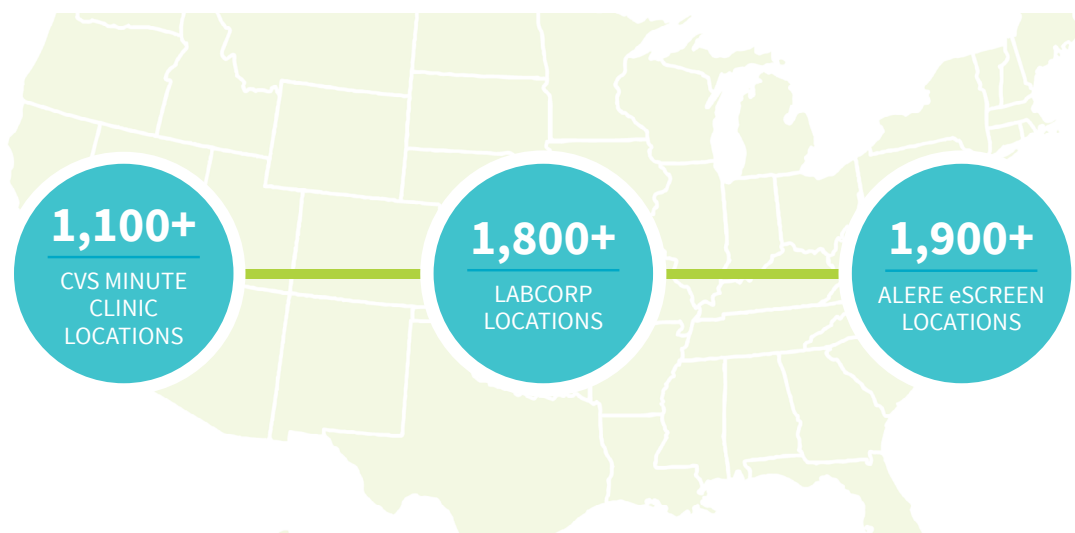

At WCS, we are committed to providing flexible options and easy access to screening services for your entire employee population.

We plan and execute top-rated on-site screening events for employees—but for remote workers, smaller satellite locations, and scheduling convenience, participants may prefer to take advantage of off-site options.

Our network of Patient Service Centers, Physician Forms, and full support for At-Home Test Kits makes us a top vendor for employee populations of all shapes, sizes, and locations.

We make sure that every employee has access to their results, that off-site participation is included in all of our aggregate reports, and that all participants experience the consistent care and service that sets WCS programs apart.

5,000 Patient Service Centers Nationwide:

Employees can take a voucher form to any of the above locations closest to them, complete their screening, and know that our team is securely processing their data and syncing their results on the back end. Our Program Managers are ready to recommend which combination of the above options is the best fit based on the geographic distribution of your employee population.

ADDITIONAL OFF-SITE OPTIONS

Primary Care Physician Forms

Some employees may find it more convenient to receive screenings from their primary care doctor. In that case, we offer participants the option to download a physician form, take it to their doctor's office, and re-upload it to our portal for secure processing.

At-Home Test Kits

Our Home Test Kit Service allows participants to complete a self-administered screening. Participants can request a kit through a simple web-based form, available through WellConnect Plus, a client or partner's portal, and/or a Single Sign On connection. Once they request a kit, Clinical Reference Laboratory will ship one to them within two weeks. Kits include all necessary testing materials, instructions for completing the tests, a results form, and a return shipping label with instructions.

Powerful, Intuitive Technology for Every Participant

In 2018, we upgraded our participant portal to make off-site options even more accessible.

Streamlined Experience

The dynamic portal homepage shows only the on-site and off-site options the participant is eligible for, streamlining their options and making portal navigation easy.

Our portal also integrates a results dashboard, so that all participants—regardless of the screening option they use—can view their full history of results.

Hassle-Free Participation

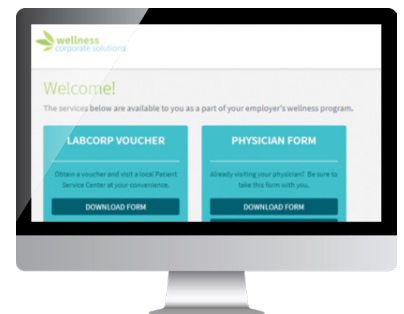

Participants can download vouchers pre-populated with their information directly from the portal, eliminating the repetitive hassle of filling out forms from scratch.

Seamless Processing

Our physician form uploader tool allows participants to not only download a pre-populated physician form, but also re-upload it directly to the portal for seamless, speedy processing.

For all other vouchers, our partnerships with Patient Service Centers mean we can smoothly integrate all results from off-site participants into your full wellness program.

Have questions about the best options for your population? We're ready to walk you through all of the details and design a suite of options that fit your needs. Contact your Program Manager or WCS sales representative today to learn more.
